

GLOBAL LABOR CHAIN

A Decentralized Precise Global Labor Philanthropy Platform

Whitepaper

What is the Problem

One of the safest ways to transfer rights and interests for international workers is to transfer through multinational banks. However, the transmission process is cumbersome and long-term, and the loss of workers is relatively large, which is a huge loss to low-income migrant workers.

On the other hand, due to the limited coverage of the transmission media for the rights and interests of migrant workers and the high share of transnational workers without card and account, more international workers will not choose the formal banking system, but forced to find other ways, such as illegal banking, private banking and other illegal, high-risk, high-loss way.

Our Vision

Provide high-speed, portable and guaranteed services to the migrant workers

Promote stable and healthy development of the global labor market

Help enhance the rights and interests of migrant workers

Our Proposed Solution

Value layer

The value layer is mainly composed of labor value circulation agencies, distributed application clients and accessible users, forming an ecosystem for the transmission of GLCC labor rights and interests .

Operating layer

The Operating Layer is comprised of The Foundation and Global Operations System. The Foundation and operating system provide a solid support system as a bridge for the development of GLC's underlying technologies and the establishment of public welfare projects.

Technical layer

Based on the decentralized blockchain technology, an innovative GLCC equity transfer model will be implemented. The self-developed GLC ATM will be set up globally, forming a global network of nodes and a distribution network of labor rights and interests.

The circulation and application senses

1. Labor rights holders of State B in State A deposited the labor rights acquired in country A into a GLC ATM machine personal account through GLC ATMs on the GLC platform, and exchanged the corresponding GLCCs.
2. The GLCCs in the designated account enter the trading platform for circulation.

产品专区

- 在线申请
- 快速审批
- 实时查询

- 无需任何抵押和担保，优质企业正式员工，即可轻松申请！
- 超低利率，企业员工团办利率更优惠，目前一年利息低至 5.655%；
- 根据收入和公积金缴存情况给予授信金额，最高可达 100 万；
- 审批快速，资料齐全情况下一周内审批放款；
- 三年循环额度，30万额度以下可在手机银行、网上银行自助提款，实时到账；
- 按日计息，随用随还，不用不计息。
